As detailed in the Oster/Las Pilitas Quarry Draft Environmental Impact Report (DRC2009-00025), I strongly support Project Alternative 6.5 (No Project). This alternative allows for continued agricultural use of the project site and creates no other environmental impacts. Project Alternative 6.5 is highly compatible with Residential Rural zoning immediately adjacent to the proposed project site, appropriate for the publically-funded infrastructure within the region, and maintains the rural character of Santa Margarita, CA.
